

◀ **Before** | The large master bath's existing floor, vanity, and shower enclosure were in fine shape, but the tub was too small and the wood window seat too wide.

◀ **After** | Slab *creama marfil* (creamy marble) on the new tub deck and seating area transforms a once-awkward corner into a harmonious **PLACE OF REPOSE**.

A decorative band of *pietra azzurrata*, a type of honed marble, encircles the room.

▲ Walls painted tidepool blue act as a cool backdrop for a white-framed mirror and polished-nickel sconces. In the mirror's reflection is a wall-mounted television, with its speaker installed above.

◀ Cap, mosaic, and liner pieces of *pietra azzurrata* inject natural color and texture into the refined scheme. The small tile squares are "hand chopped" to give them irregular edges.
